

# The Emergence of a Commonly Sensed Consciousness

**Facilitated by Sperry Andrews**

*This is a chance to practice a life-changing experience, feeling quiet mind and causeless joy, liberated from the illusions of separation and limitation, while accessing our ability to resolve complex problems. This easily reproducible exercise shows how "The world can live as one." i.e. [Investigating the Evolution of Group Intelligence](#)*

As a scientist of human consciousness, exploring how we all can live in harmony, my passionate interest in consciousness-for-its-own-sake began with a childhood near death experience. Today, as founder/co-director of an internationally-based institute, researching how every man, woman, and child is linked by our innate capacity for being collectively conscious, I've explored how the exclusivity of an egocentric "separate self" is simply a learned by-product of a fragmentary way of paying attention. My research spans all the branches of science, and intimately clarifies why we have avoided "unity consciousness" and how we can unlearn this habit. How, as millions of us learn to pay attention together, this "promises" to eliminate poverty, pollution, disease, crime and war. Through thirty years of trial and error research with hundreds of multicultural groups, I've shown how paying attention together grants us access to a shareable spirited intelligence.

BIO: Whether one-on-one, serving on a team or as a group facilitator, I love sharing experientially and insightfully. My background is in physics, neuroscience, philosophy, (para)psychology, art and art history, healing, mysticism, and filmmaking. For over thirty years, I have explored two-way telepathic awareness internationally with hundreds of groups, contributed to original laboratory research in the field of distant mental influence, co-authored and published essays on the emergence of Consciousness as wholly integrated with the evolution of space-time, energy, matter, mind and body. INTENTION: As founder/co-director of the Human Connection Institute, advisory board member of the Lifeboat Foundation and director of group intelligence on the faculty of the Vetha Center for Transdisciplinary Studies, I design and implement educational programs to help shift the separative 'mind-set' of humanity. It is my sense of nature's intentions that our interconnectedness is meant to be felt and thought, intuitively, by every human being. By sharing the experience of being a single body, heart and mind with thousands of individuals, I have witnessed and demonstrated inter-subjectively, as well as objectively, that anyone can access a commonly sensed unconditionally loving intelligence. My years of experiential research confirms that this can happen rapidly and reliably without effort—even with total strangers. [Testimonials][G.I.G. INVITE][Autobiographic Sketch]

MISSION: I currently orchestrate a large-scale, spiritually-inspired, multinational, scientifically-based, media project, designed to facilitate humanity's imminent leap into collective enlightenment. I initiated the Human Connection Project over twenty years ago to present life-changing, scientifically derived images of our interconnectedness via news reports, print media, talk show formats, feature documentaries and dramatic films [LogLine/OneSheet][Feature Film Outline] Experiences of unity consciousness are now being offered online as the next step in social media so people can access their combined intelligence and spiritual unity around the clock in any language. [Group Insight Game][Executive Summary][HCP Funding Protocol][Being Conscious Together]

VISION: Our capacity to share a "common sense" appears to be the next step in human evolution and it may well prove to be essential to our survival as a species. Before a person is presented with a sensation, feeling, thought or intuition, it can require billions of cooperating brain cells orchestrating together. Similarly, within our "global brain," billions of people may require "seeing is believing," scientifically-derived evidence of our innate unity for humanity--as a whole--to recognize and welcome consciously felt perceptions of being interconnected.
